WIRELESS DOOR LOCK REMOTE CONTROL SYSTEM

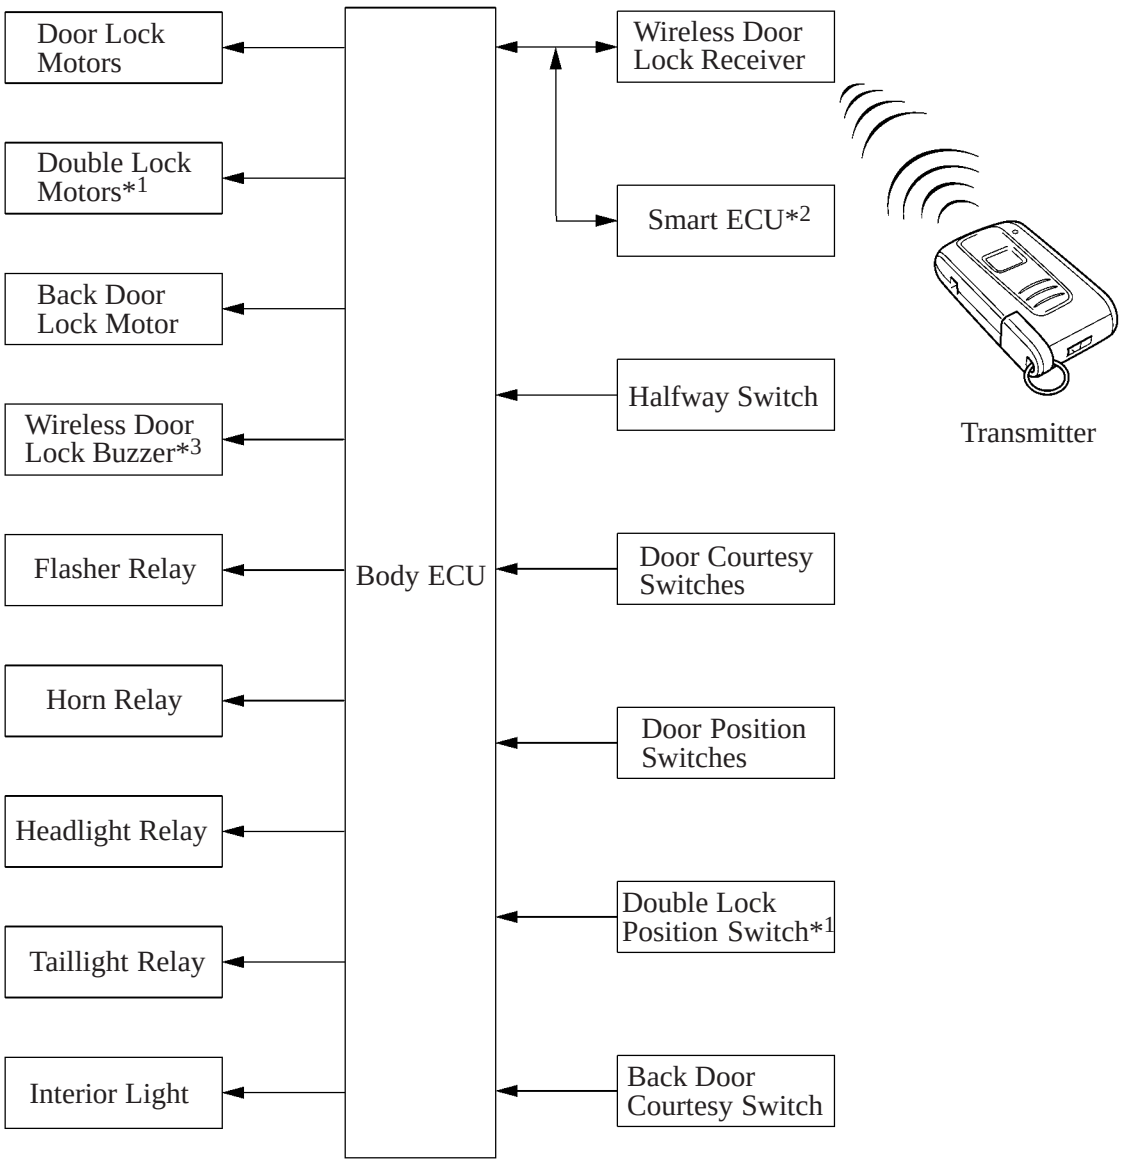

■DESCRIPTION

The wireless door lock remote control system has been adopted as standard equipment.
This system is a convenient system for locking and unlocking all the doors, at a distance. This system in the new Prius has the following features:

- In this system, the wireless door lock receiver performs the code identification process and the body ECU effects the door lock control. Serial data link is provided for communication between the wireless door control receiver, the body ECU and smart ECU*.
- A key integrated type transmitter is used, and it contains the following two switches: the door lock switch and door unlock switch.
- A rolling code system, in which the signal configuration changes each time when a signal is transmitted by the transmitter, is used.
