SEAT BELT REMINDER SYSTEM

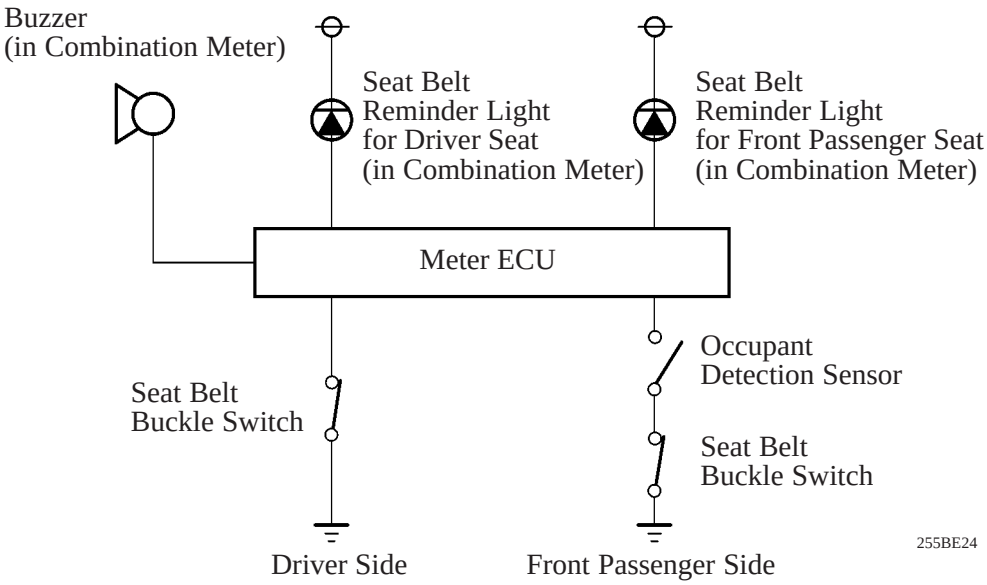

■DESCRIPTION

- A seat belt reminder system is used. If the seat belt is not buckled, the reminder light flashes and the buzzer sounds.
- When the power switch is turned ON, this system determines whether or not the seat belt is buckled depending on whether the signal from the switch in the seat belt buckle is ON or OFF.
- The occupant detection sensor provided in the seat cushion of the front passenger seat determines whether or not an occupant is seated in the front passenger seat.
- The specifications of this system vary by destination as indicated in the table below.

Item		Europe	Australia
Seat Belt Reminder Light	for Driver's Seat	Blink	Blink
	for Passenger's Seat	Blink	Blink
Buzzer		Sound	—

*: Driver and Passenger Seat
