FRONT WIPER DEICER SYSTEM

■ DESCRIPTION

The front wiper deicer system uses the heater wire in the front windshield glass to deice frozen front wipers.

- This system is available as optional equipment on the cold area specification LHD models for Europe.
- This system is activated when the power source mode is selected to IG-ON, and front deicer switch is pushed. This switch is provided with a timer function to keep on the deicer for approx. 15 minutes.
