Side Design

- The side of the vehicle portrays a unique cabin design consisting of a wedged surface composition and a dynamically drawn arc.
- Roof rails are available as optional equipment on the models for Europe. They are standard equipment on the high grade models for other destinations.
- Over-fenders are standard equipment on the 2AD-FHV engine models for Europe and the high grade for Australia and the G.C.C. countries. They are available as optional equipment on the high grade 4WD models for general countries.
