NEW FEATURES

EXTERIOR

■ FRONT DESIGN

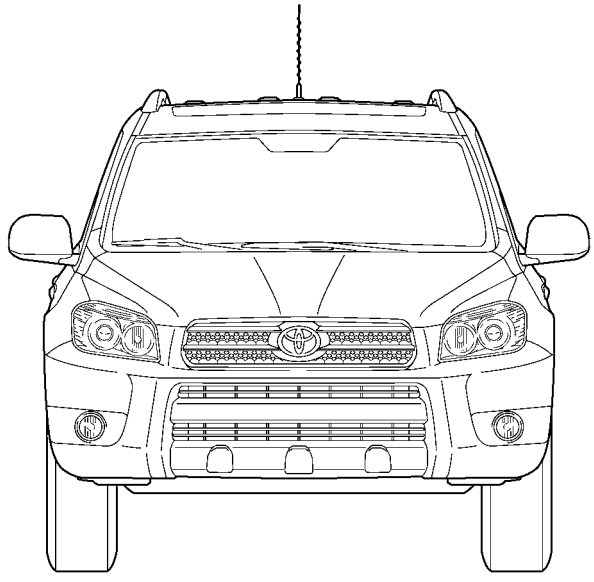

The front design on the models for Europe has been changed as follows:

- 2 types of design are provided for the front bumper and radiator grille. A design characterized by a large radiator grille and an underguard is provided as standard equipment for the models for Europe with 2AZ-FE engine, and as optional equipment for the models with 2AD-FHV engine.
- A newly designed headlight incorporating a front side turn signal light within the same lens is used. The models with 2AZ-FE and 2AD-FHV engines use a smoke-painted extension in the headlight to achieve a sporty design.
- The models with fog lights use plated rings for a luxurious look.

■ REAR DESIGN

The rear design on the models for Europe has been changed as follows:

- The design of the rear bumper of the models with 2AZ-FE engine has been changed.
- A design excluding the spare tire mounted on the back door is available as optional equipment for the models with 3ZR-FAE engine, high-grade of models with 2AD-FTV engine and models with 2AD-FHV engine and run-flat tire.
  A license garnish is provided on models without the spare tire. The license garnish uses plating at the bottom for a luxurious look.
- Newly designed rear combination lights are provided with 12 Light Emitting Diodes (LEDs) in the taillights and stop lights. A rear combination light which uses 18 LEDs is provided on the models with 2AD-FHV engine.
