

Multiplex Communication System – CAN Bus

* 1 : w/ Electric Modulated Air Suspension

System Outline

CAN has two lines as a pair which make communication with operating voltage. CAN has excellent data speed and error detecting capacity. It consists of vehicle control systems such as engine control module, data link connector 3, translate ECU, skid control ECU with actuator and suspension control ECU*.

* Optional equipment

This system is working for the following systems:

- * ABS
- * Cruise Control
- * Electric Modulated Air Suspension
- * Electronically Controlled Transmission and A/T Indicator
- * Engine Control
- * TRAC
- * VSC
