EQUIPMENT

Navigation with AV System

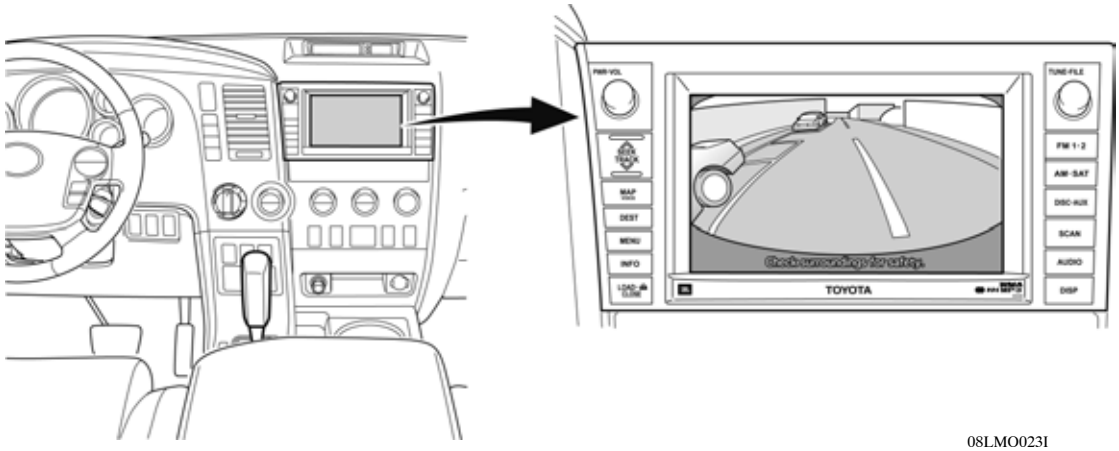

- Through the use of the GPS (Global Positioning System) and map data which is stored on a DVD, the navigation system analyzes the position of the vehicle and indicates that position on the map that is displayed on 7.0-inch wide LCD (Liquid Crystal Display) with a pressure sensitive touch panel.
- The navigation system employs a voice recognition function with a voice recognition microphone installed in the overhead console. The voice recognition function can be turned ON and OFF using the switch on the steering wheel.

Rear View Monitor System

To assist the driver in parking the vehicle by monitoring the area behind the vehicle, the rear view monitor system has a television camera mounted on the rear license plate garnish to display a view of the area behind the vehicle on the display.
