SAFETY

SRS Airbag System

- Dual-stage SRS (Supplemental Restraint System) airbags are standard equipment for the driver and front passenger seats. In the event of a severe frontal collision, the airbags function with the seat belts to help reduce the impact on the driver's and front passenger's heads and chests.
- The SRS side airbags (for the driver and front passenger seats) which help reduce side impact are provided as standard equipment.
- The SRS curtain shield airbags (for the front and rear seats) which help reduce side impact are provided as standard equipment.
