REAR SEAT ENTERTAINMENT SYSTEM (RSES)

■ DESCRIPTION

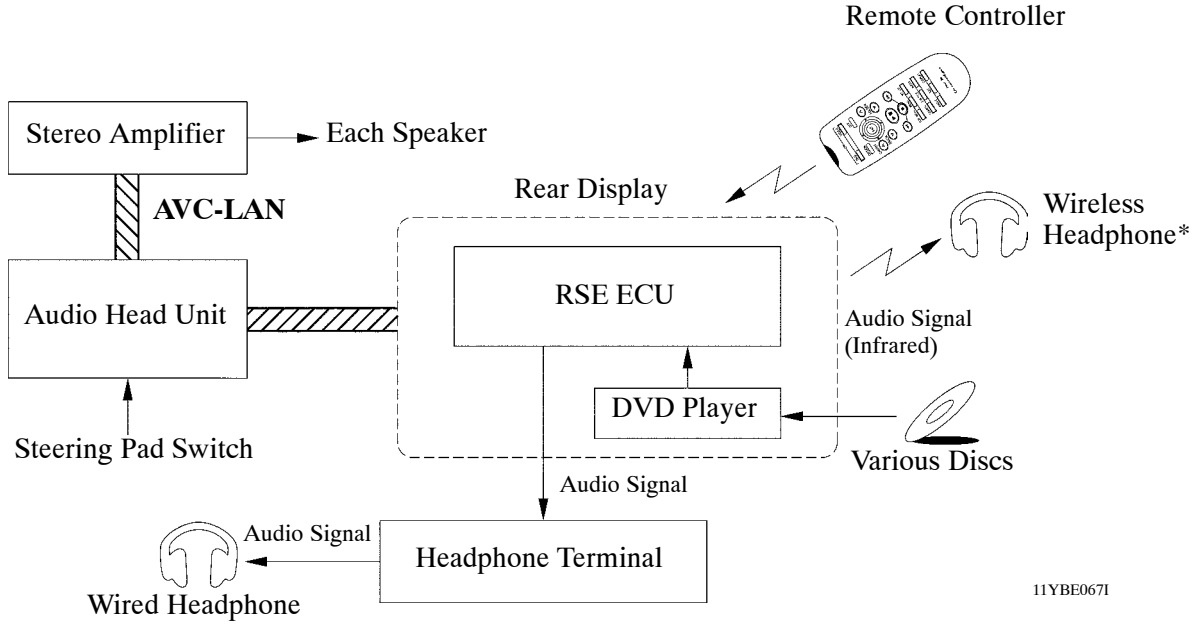

The Rear Seat Entertainment System (RSES) displays visual images from the DVD player on the rear display. The RSES also outputs audio sound via the speakers or headphones. The features of this system are as follows:

- The RSES is available as optional equipment.
- The RSES is controlled by the RSE ECU built into the rear display.
- A 9.0-inch rear display is used and the maximum opening angle of the rear display is 125°.
- Discs containing MPEG Audio Layer-3 (MP3) file can be played.
- Discs with the marks shown below can be played on the DVD player:
