Heated & Ventilated Seat System

- The heated & ventilated seat system is provided as standard equipment for the Platinum grade.
- The heated & ventilated seat system consists of a heater and a ventilator that are built into the seat to ensure the comfort of the occupant.

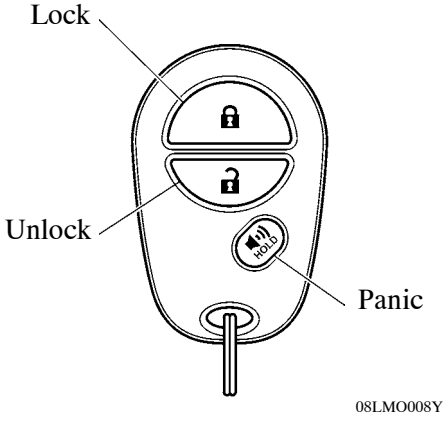

Heater

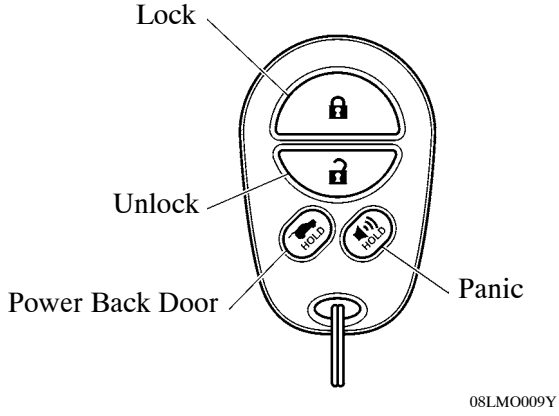

Ventilator

Wireless Door Lock Control System

- A wireless door lock control system with a panic button and an answer back function is standard equipment for all models.
- When the answer back function is active, the hazard warning light blinks and the buzzer sounds when the doors are locked or unlocked.
