SAFETY

Supplemental Restraint System (SRS) Airbag System

- Dual-stage SRS airbags are provided as standard equipment for the driver and front passenger seats. In the event of a severe frontal collision, the airbags function with the seat belts to help reduce the impact on the driver's and front passenger's heads and chests.
- SRS side airbags (for the driver and front passenger seats), which help reduce side impact, are provided as standard equipment.
- SRS curtain shield airbags (for the front and rear seats), which help reduce side impact, are provided as standard equipment.
