INTRODUCTION

OUTLINE OF NEW FEATURES

The following changes are made for the new model.

1. 3UR-FE Engine

A brake override system has been changed. The driving torque is restricted when both the accelerator and brake pedals are depressed. (For the Activation Conditions and Inspection Method, refer to the repair manual.)

2. Steering Wheel

- A 4-spoke urethane steering wheel, 4-spoke leather steering wheel and a 4-spoke leather and wood steering wheel are provided.
- An audio switch, a telephone switch, and a voice recognition switch are provided for the steering pad switches.

4. Air Conditioning

- A pollen removal type air refiner element is used to remove dust, pollen, and other micron particles from air entering from outside the vehicle to provide a comfortable cabin of clean air.
- The customization function for the compressor/air inlet DEF operation has been discontinued. The compressor/air inlet DEF operation is now always set to LINK.
