■ FUNCTION

The Bluetooth hands-free system has the following functions:

Function		Outline
Calling with a Bluetooth Phone	By Dial Pad	The user can call by inputting a telephone number.
	By Contacts	The user can call by using the contact data that has been transferred from the user's cellular phone. The user can register up to 2500 items in the contact list.
	By Home Screen	The user can make a call by using the widget on the home screen.
	By Call History*1	The user can call by selecting a telephone number from the call history.
	By Favorites*1	The user can call by using registered telephone numbers selected from the contacts, dialed numbers or received calls.
	By Voice Recognition (Dialing by Voice Tag)*1,*2	The user can call by giving a registered voice tag.
	By Point Of Interest (POI)*2	The user can call by operating a switch when "Call" is displayed on the navigation screen.
Receiving a Call using a Bluetooth Phone*1		When a call is received, the incoming call screen is displayed with a sound.
Talking on a Bluetooth Phone*1		While the user is talking on the phone, the talking screen is displayed.
