## ■ FUNCTION

### MirrorLink™ Function

- To utilize the MirrorLink™ function, it is necessary to connect a compatible smartphone*1 to the radio and display receiver assembly*2 using a USB cable.
- After a connection is established, the screen of the smartphone is displayed on the radio and display receiver assembly*2. Using this screen, the user can operate applications installed on the smartphone and listen to the audio of the smartphone via the vehicle speakers.

*1: This function is not available if the smartphone is not compliant with MirrorLink™ of the Car Connectivity Consortium.
*2: Models with display audio system

*: The illustration shows an example for Android.
