■SEAT

1. Seat Cover

- The fabric seat cover material used on access cab and double cab models has been changed.
- On double cab models and package models for SR5 with access cab, the seat cover design for the driver and front passenger seats has been changed.
- On OFF ROAD, SPORT and X-Runner package models, a water repellant and waterproof fabric is used for the seat surface to allow easy wipe-down of dirt and water. The fabric uses a urethane film to prevent dampness. The urethane film allows the seat to “breath”, while also preventing water from soaking in.

2. Rear Headrest

On double cab models, the side rear passenger seat headrests have been increased in size, and a fold-down mechanism is used to ensure occupant protection and rearward visibility. The headrest can be folded forward by operating the lever on the side of the headrest.

3. Child Restraint System

The Child Restraint System (CRS) lower anchors have been removed from the front passenger seat on access cab models. The CRS lower anchors have been newly provided on the right rear passenger seat. On the right rear passenger seat, a CRS tether anchor bracket has also been added.
