■SEAT BELT WARNING SYSTEM

1. General

The conditions, which cause the seat belt warning light to come on and the multi buzzer built into the combination meter to sound, have been changed as described below.

○: Applicable —: Not Applicable

Conditions	Warning operation	’12 TACOMA	’11 TACOMA
After the law buzzer sounds, when the vehicle is driven at 20 km/h (12 mph) or more, and either of the driver’s or front passenger’s seat belt is still unfastened.	Buzzer sounds once	○	—
	Buzzer remains off	—	○
When the vehicle was driven at 20 km/h (12 mph) or more and the buzzer sounding conditions were being met due to an unfastened driver’s or front passenger’s seat belt before the vehicle is parked.	Seat belt warning light comes on but buzzer remains off.	○	—
	Seat belt warning light flashes and buzzer sounds.	—	○
