REAR SEAT ENTERTAINMENT SYSTEM

■DESCRIPTION

The RSES (Rear Seat Entertainment System) displays visual images from the DVD player or an auxiliary player on the rear display. The RSES also outputs audio sound via the speakers or headphones. The features of this system are as follows:

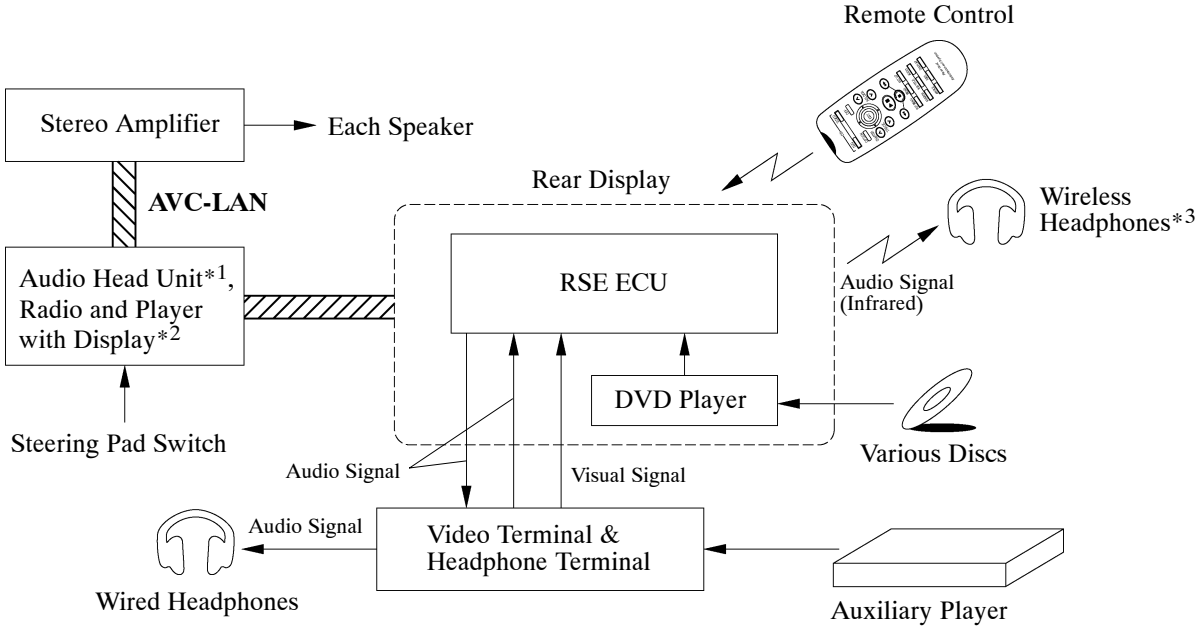

- A 9.0-inch rear display is used and the maximum opening angle of the rear display is 125°.
- Discs containing MP3 (MPEG audio layer-3) file can be played.
- Discs with the marks shown below can be played on the DVD player.

03F0NF13C

- The RSES is controlled by the RSE ECU built-into the rear display.
- The RSES is available on the following models as optional equipment.
  - CrewMax models with JBL branded premium audio system
  - CrewMax models with JBL branded navigation with AV system
