Rear Seat Entertainment System

The RSES (Rear Seat Entertainment System) displays visual images from the DVD player or an auxiliary player on the rear display. The RSES also outputs audio sound via the speakers or headphones. The features of this system are as follows:

- A 9-inch rear display is used and the maximum opening angle of rear display is 125°.
- Discs containing MP3 (MPEG Audio Layer-3) files can be played.
- Discs with the marks shown below can be played on the DVD player.
