- The 13CY model navigation system is used.

▶ Display Audio Specification ◀

Display	7.0-inch Wide Video Graphics Array (WVGA)
Navigation ECU Manufacturer	Panasonic
Gyro Sensor	Piezoelectric Ceramic Element
Map Data Media	Micro SD Card
Micro SD Card	Panasonic
Voice Guidance Supported Languages	English, French, Spanish
Voice Recognition Supported Languages	English, French, Spanish

- The navigation system has a voice recognition system that uses natural speech technology to interpret a user's intent based on their natural speech pattern. The system recognizes natural speech patterns as voice recognition commands.
- The radio receiver assembly supports HD data services that enable the navigation system to receive and use information from HD radio signals.
- The navigation system sends navigation information to the combination meter assembly. The user can view the compass display and turn-by-turn directions to the destination on the multi-information display.
- A multiple display function is provided. Due to this function, a map screen, Bluetooth hands-free screen, and audio screen or vehicle information screen can be displayed on the multi-display assembly simultaneously. Screen layout and displayed items are customizable, and the top screen of each function can be displayed by selecting the corresponding Apps screen.
- The Home screen is displayed by pressing the HOME switch, the Apps screen is displayed by pressing the APPS switch and the Audio screen is displayed by pressing the AUDIO switch. The following shows the Home screen.
