Customize Home	● The layout of the home screen can be changed between 2 and 3 panels. ● Widgets can be selected for display.
Screen Off	Turns the screen off.

■ ENTUNE

- The Entune service makes it possible to operate specified applications on the multi-display by using Bluetooth to connect the navigation system to a cellular phone with the Toyota Entune application installed.
- The Entune service enables communication between the navigation system, application server and content provider utilizing the Entune application installed on a cellular phone.
- The following applications (“Apps”) are available for the Entune service: Local business search, internet radio, etc. However, since this supported application lineup is subject to change, visit http://www.toyota.com/Entune/ for details on the Entune service.
- For the navigation receiver assembly, when the “Apps” soft button is selected and an update is available, the user will see a pop up notifying them that an update is available. They will have the option of accepting or canceling the update.

▶ Utilization image of the Entune service: ◀

*: Timely update of “APPS” can be done

- The Entune service search engine supports the center voice recognition system, enabling spoken words that are not included in the voice recognition database of the navigation system to be recognized. The center voice recognition system has a database within itself, thus more voice data can be recognized than usual.
