4. Combination Meter Assembly

Combination Meter Assembly (TFT Type Multi-information Display)

The combination meter assembly is provided with the multi-information display to inform the driver of a malfunction in the blind spot monitor system.

- Two types of warning messages are used for the blind spot monitor system, as described below. The blind spot monitor system will not operate when these messages appear in the combination meter assembly.

Multi-information Display	Detail
 24WBE024Y	This message appears when the blind spot monitor sensor detects a system malfunction.
 24WBE025Y	This message appears when the blind spot monitor sensor determines the following conditions: ● Dirty blind spot monitor sensor ● Poor weather condition ● Significantly high or low outside temperatures After these conditions have been eliminated, the system will operate normally.

Combination Meter Assembly (LCD Type Multi-information Display)

Illuminates the blind spot monitor indicator when the blind spot monitor system malfunctions and when the system cannot be used temporarily to inform the driver.

■ DIAGNOSIS

The blind spot monitor system is equipped with a diagnosis function that can display warning messages in the multi-information display. For details, refer to the Repair Manual.
