■CHARGING SYSTEM

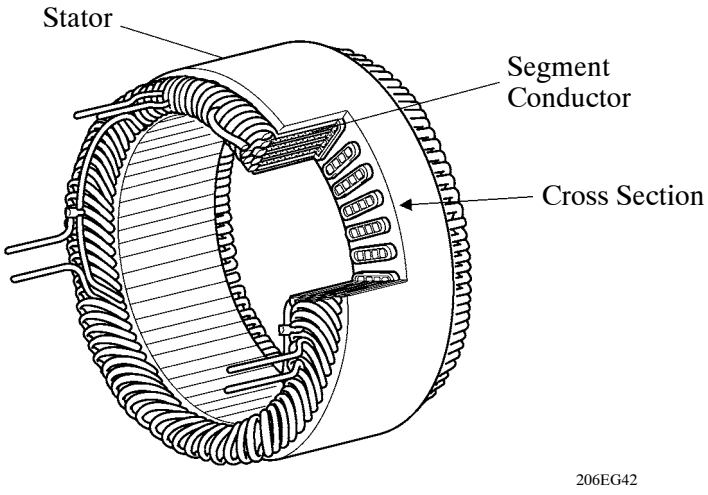

- A compact and lightweight segment conductor type alternator that generates high amperage output in a highly efficient manner is used as standard equipment.
- This alternator has a joined segment conductor system in which multiple segment conductors are welded together to form the stator. Compared to the conventional winding system, the electrical resistance is reduced due to the shape of the segment conductors, and their arrangement helps to make the alternator compact.

Segment Conductor Type Alternator

Conventional Type Alternator

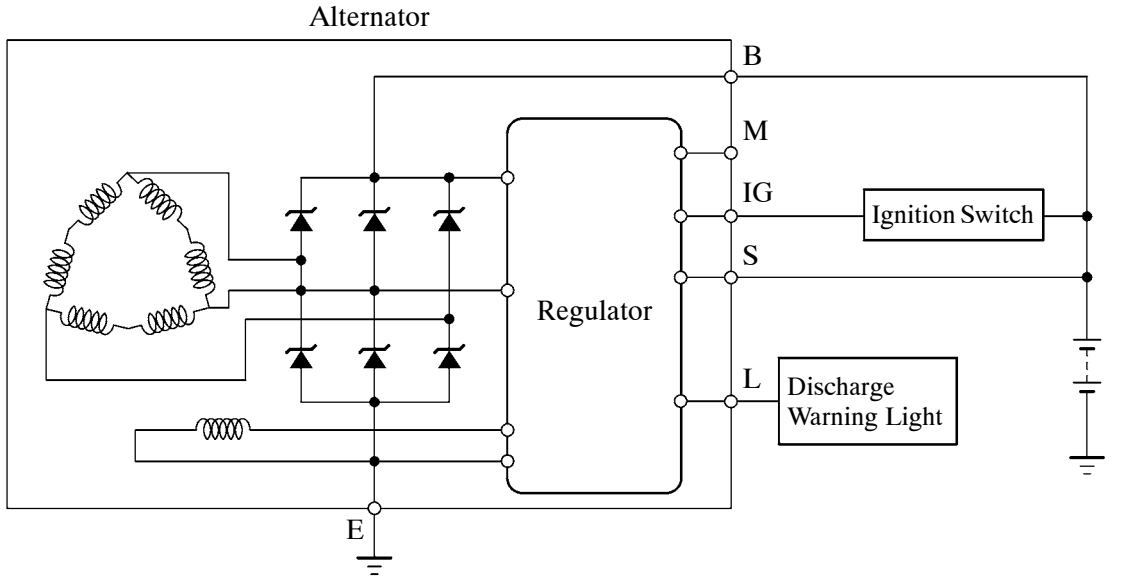

Stator of Segment Conductor Type Alternator

NF

▶ Specifications ◀

Type	SE0
Rated Voltage	12 V
Rated Output	100 A
Initial Output Starting Speed	Max. 1,500 rpm
