■DAYTIME RUNNING LIGHT SYSTEM

- The daytime running light system is provided as standard equipment on the cold area specification S rank LHD models for Europe that are produced by TMC, and is available as optional equipment on the cold area specification S rank LHD models produced by TMMF.
- This system is designed to automatically activate the headlights (high beam) and taillights during the daytime to keep the car highly visible to other vehicles.
- This system is controlled by the daytime running light relay.
- This system is enabled when the conditions given below are met:
  1) The power source mode is IG-ON.
  2) Alternator L terminal signal input is ON (engine running condition).
  3) Light control switch is OFF.

■LIGHT REMINDER SYSTEM

The light reminder system is newly provided as standard equipment on all models.
When the power source mode is changed from the IG-ON to ACC or OFF while the driver's door is open with the taillights turned ON, this system warns the driver that the lights remain ON by sounding the multi buzzer. The multi buzzer is located inside the combination meter.
