WIRELESS DOOR LOCK REMOTE CONTROL SYSTEM

■ DESCRIPTION

The wireless door lock remote control system is provided as standard equipment on the SOL grade for the Europe models and the models with the smart entry & start system, and is available as optional equipment on all other models.
This system is a convenient system for locking and unlocking all doors at a distance. This system in the new models has the following features:

- In this system, the wireless door lock receiver performs the code identification process and sends the lock or unlock signal to the main body ECU, then the main body ECU effects the door lock control.
- A key-integrated, two-button (lock, unlock) type transmitter is used.
- The hazard warning light blinks when the door lock or unlock operation is performed by the wireless door lock remote control system.
