# SMART ENTRY & START SYSTEM

## ■ DESCRIPTION

The smart entry & start system has a wireless door lock remote control function and engine immobilizer function. Furthermore, in this system, the following functions (entry function and start function) are also possible simply by carrying the key in the driver's possessions without using a key or transmitter button.

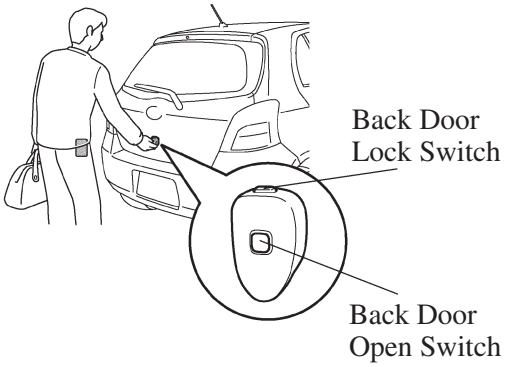

- Door unlock/lock (entry unlock/entry lock functions)
- Engine start simply by pressing the engine switch while depressing the brake pedal*1 or clutch pedal*2 (start function)
- Back door open (entry back door open function)

This system is optional equipment on the SOL grade for the Europe models.

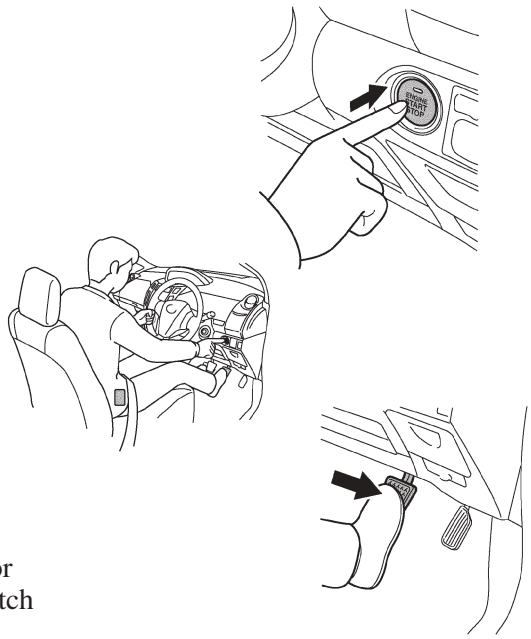

*1: Only for M-MT Models
*2: Only for M/T Models

**Entry Unlock/ Entry Lock Functions**

**Entry Back Door Open Function**

M-MT Model: Depressing the brake pedal
M/T Model: Depressing the clutch pedal
