INTERIOR

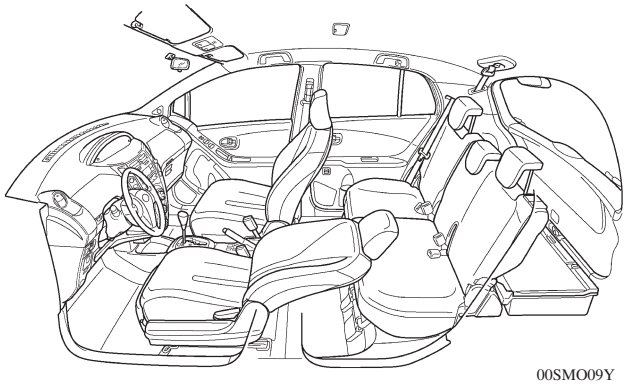

Interior Design

1. Hatchback Model

A "loop style" is used for the interior design, creating a sense of continuity in the roof headlining, front pillar, and door armrest. The upper section has been designed for a spacious feel, and the lower section has been designed for stability, creating a simple design with a cutting-edge impact.

3-door Hatchback Model

5-door Hatchback Model

2. Sedan Model

The interior design achieves an innovative and premium look through a roomy space and high-quality shape.
