HOW TO USE THIS CATALOG AND LOCATE PARTS

This Catalog is divided into Part Groups in which illustrations for parts of a similar function and/or location are published. The Group Contents listing on the next page shows the type of parts contained in each group. Tabs are provided or available to separate each group.

Several methods may be used to locate a specific part:

Option 1: From the Group Contents listing, select the group which would most logically contain the part to be found. Or open the catalog to Group 1, Master Group Illustration Index. Select the illustration group most likely to contain the parts associated. Turn to the Illustration Index in front of that group to select illustration and locate the part item numbers and associated text information.

Option 2: If the "noun" name of the part you seek is known, an alphabetical index of Nouns and illustration titles is provided to assist in finding the part. Several keys may be found in this index.

RESERVOIR Power Strng. Oil Pump. . . Group 19 — Group Reference
ALTERNATOR, 3.3L Engine. . . . . ..8-200 — Illustration Reference
STARTER. . . . . 08- 105- 1 — Illustration/Item Reference

Group
Illustration No.
Item

Option 3: If the part number is known but the applications need to be determined, refer to the numerical index. This index shows the group, illustration number and item for each part listed in the catalog. Multiple references mean the part is listed more than once.

Option 4: From Parts Catalog Group Index INF-3, select the Group that parts most logically would be found in.

Example:

Group 9 Contains Engine by Type
- 9A ENGINE = 2.5L (4 Cyl.)
- 9P ENGINE = 2.0L (4 Cyl.)
- 9B ENGINE = 3.3L & 3.8L, 2.5L (V6)

Group 23 Contains Exterior Ornamentation (E = Exterior Ornamentation)
- YJ = Ext. Orn.Wrangler
- XJ = Ext. Orn.Cherokee
- ZJ = Ext. Orn.Grand Cherokee

Group 23A Contains Sheet Metal Body (S = Sheet Metal Body
- YJ = Sheet Metal Wrangler
- ZJ = Sheet Metal Grand Cherokee

Group 23D Contains Doors (D = Doors & Related Parts)
- YJ = Doors Wrangler
- ZJ = Doors Grand Cherokee

PAGE NUMBERING

Two-part page numbers are used throughout this catalog. The first part of the page designation indicates one major group or section. The second part indicates the actual page number in the group. For example:

2-1 indicates Group 2, Front Suspension, Page 1
3-4 indicates Group 3, Axle Rear, Page 4

In the maintenance of the Loose Leaf Parts Catalog Revision Service, it may become necessary to add information beyond the capacity of the page. In this event, an "A" page wil be used. For example, if it becomes necessary, because of change, to add several part numbers to page 2-1 and space does not permit the addition, you will be given Page 2-1A. Page 2-1A should be filed immedately following Page 2-1

Figure and Item Numbers are also commonly used to identify locations in this Catalog, i.e., 14-910/8 refers to Group 14, illustration 910, Item Number 8. Illustration Numbers are always ascending sequential within the Groups

RIGHT AND LEFT PART NUMBERS

Right and Left part numbers are frequently combined on one line, e.g., 3514 444-5. Such numbers are interpreted as 3514 444 Right side application and 3514 445 Left Side. Right and Left Sides are always determined by their relationship to the driver when normally seated and looking forward.

SYMBOLS USED IN THIS PARTS CATALOG

The following symbols are commonly used with Part Number and quantity information in this Catalog:

- Precedes a new part number to the catalog and remains in subsequent issues until stock is available for shipment.

AR - Indicates the quantity required may vary or is to be determined by the user.

PAR - Indicates Paint As Required.

SPECIFYING INFORMATION

The following information is included in this Parts Catalog:

1. Part Name.
2. Part Number.
3. Model Application.
4. Quantity used per vehicle.
5. Description and dimensions necessary for proper identification of parts where necessary.
6. Model or Engine Column: Engine by Displacement or Vehicle Model Code Body Style Code or Price Class.
7. Effective points of model year running changes are indicated by vehicle serial number, engine number or body number where applicable. When serial number effective points are not available, production effective dates are used. (Refer to the Federal Certification Label for the build date.)
8. Parts designated as CANADA or EXPORT are not available through U.S. parts outlets.

In the event replacement parts not listed herein are required due to a special service situation, Chrysler Dealers should contact their factory specifier for assistance. Problems encountered with particular part specifications can be resolved in the same manner.

ILLUSTRATION NUMBERING INDEX

Illustration numbers in this Catalog are group STANDARDS. Which indicates group and CONSISTENT Content. EXAMPLE: 8-100 means Group 8 from 8-101 to 8-199 will always contain starters in all of our Parts Catalogs for 1994. 8-200 means Group 8 from 8-201 to 8-299 will always contain alternators in all of our Parts Catalogs for 1994. Refer to Group-1 Master Group Illustration Index or the first page of each group for parts information contained within that group.

ILLUSTRATION INDEX

This index is a compilation of catalog parts description data with reference to illustrations, figures and key numbers as shown:

ILLUSTRATION INDEX **GROUP** **ILLUS. NO.**
THROTTLE BODY 14-600

The first page of each group contains a listing of all illustrations within that group. Also refer to illustrations alphabetically listed in information section.

ALPHABETICAL INDEX

This index is a compilation of catalog parts description data with a reference to the location of the item by group - Figure and key number as shown in the following example:

Housing, w/Pump YJ **7 - 410/ 18**
Group
Illustration No.
Item

The index will be expanded progressively as data is added to computer files. To locate a part by name, refer to the Alphabetical Index. This index indicates the group and illustration and item number where the part is located. Alphabetical Index can be found in INF section of catalog.

NUMERICAL INDEX

A listing of Part Numbers contained in the catalog. The numbers are in numerical sequence with reference to the group and illuatration and item number where the part is located.

PARTS PACKAGES

Service Parts Packages, containing all parts needed for specific service operation, are listed in their respective groups with related parts. The listing will show adaptability and model application.

STANDARD PARTS

Important attaching standard parts such as bolts, nuts, etc. are generally listed in the text of the respective major parts groups.

CATALOG AND PARTS BULLETINS

BULLETINS are issued when important changes are made in production or when corrections are to be made in the Parts Catalog between regular revisions. All catalogs should be noted and changed accordingly to remain current between revisions.

PARTS CATALOG REVISION SERVICE

Subscribers to the Viper Parts Catalog Revision Service will be periodically provided with revised copy incorporating the lastest information. Revisions may be provided by Group or complete book copy.

NEWPART INDEX

A listing of new part numbers contained in the catalog. The numbers are in group sequence with reference to the illustration and item number where the part is located.

COLOR CODED OR COMBINED PART NUMBERS

Appearing throughout this catalog are part numbers containing both letters and numbers. For example: D500 KB7. These are good serviceable part numbers. The combination of letters and numbers merely indicates the parts are keyed to the interior color of the vehicles on which they are used.

In addition, Right and Left part numbers are frequently combined on one line; e.g., D500-1 KB7. Such numbers are interpreted as D500 KB7, Right Side application, and D501 KB7 Left Side. Right and Left Sides are always determined by their relationship to the driver when normally seated and looking forward

INTERIOR TRIM

Refer to the Group IT, Interior Trim section of the catalog, for information relative to Interior Soft and Hard Trim, Rolled Stock, etc.

NOTE: VIN information for 1993 ZJ Grand Cherokee/Grand Wagoneer. When servicing a 1993 ZJ, it is IMPORTANT to understand differences between the early 1993 vechicles and later built vechicles. To determine which vechicle you are servicing, check the 12th character of the VIN. Early vechicles have a "1" in the 12th position. Later vechicles have a "5" or higher in the 12th position.

SALES CODES

Due to the increase complexity of qualifications required to describe the application of some replacement parts; particularly those related to the Emission Control System, Sales Codes are used on a selected basis in some areas of this publication.

Normally, Sales Codes will be employed as secondary qualifiers and are for the express purpose of providing positive identification of parts applicable to vehicle components or systems so complex in nature that normal methods of written qualification are either inadequate or confusing.

The Sales code will always appear after the written description of the part; will be enclosed in parenthesis; will be prefixed S/C, and will follow a hyphen appended to the S/C, e.g.: (S/C-HAO).

To determine whether or not the vehicle for which the part is being specified was built with a particular Sales Code it will be necessary to refer to the Body Code Plate depicted on page INF-10. Sales Codes are also listed on vehicle invoices and on the Maroney label which is affixed to the side glass on new units.
